

Poll on Crime in the UK

Fieldwork: 19th – 23rd August 2019

Interview method: Online survey

Population represented: UK adults

Sample size: 1005

Methodology:

All results are weighted using Iterative Proportional Fitting, or 'Raking'. The results are weighted by age, gender, region, Social Grade, 2017 General Election vote and 2016 EU Referendum vote. Target proportions are derived from census data and election results.

Public First is a member of the BPC and abides by its rules. For more information please contact Seb Wride (seb@publicfirst.co.uk)

Thinking about crime levels in Britain as a whole over the last five years, crime levels have risen, stayed the same or declined?

	Total	Gender		Age						Social Grade		Region
