

Public First Poll for Green Alliance 2

Fieldwork: 13th May - 18th May 2022
Interview method: Online Survey
Population represented: UK Adults
Sample size: 2005

Methodology:

All results are weighted using Iterative Proportional Fitting, or 'Raking'. The results are weighted by interlocking age & gender, region and social grade to Nationally Representative Proportions

Public First is a member of the BPC and abides by its rules. For more information please contact the Public First Polling Team (polling@publicfirst.co.uk)

List of Tables

1	There are a number of ways in which the Government could look to encourage people to install smart meters. Looking at the following proposals, do you think these would be effective or ineffective at encouraging people to make these changes?Please rate on a scale of 1 to 5, where 1 indicates that this would be completely ineffective, and 5 indicates that it would be extremely effective: If the Government provided grants, which would not need to be paid back, to help people cover the upfront costs	5
2	There are a number of ways in which the Government could look to encourage people to install smart meters. Looking at the following proposals, do you think these would be effective or ineffective at encouraging people to make these changes?Please rate on a scale of 1 to 5, where 1 indicates that this would be completely ineffective, and 5 indicates that it would be extremely effective: If the Government provided loans, which would need to be paid back, to help people cover the upfront costs	10
3	There are a number of ways in which the Government could look to encourage people to install smart meters. Looking at the following proposals, do you think these would be effective or ineffective at encouraging people to make these changes?Please rate on a scale of 1 to 5, where 1 indicates that this would be completely ineffective, and 5 indicates that it would be extremely effective: If the Government provided more information on how to make these changes	15
4	There are a number of ways in which the Government could look to encourage people to install smart meters. Looking at the following proposals, do you think these would be effective or ineffective at encouraging people to make these changes?Please rate on a scale of 1 to 5, where 1 indicates that this would be completely ineffective, and 5 indicates that it would be extremely effective: If the Government provided more information on the impact which these changes would have	20
5	There are a number of ways in which the Government could look to encourage people to install better insulation. Looking at the following proposals, do you think these would be effective or ineffective at encouraging people to make these changes?Please rate on a scale of 1 to 5, where 1 indicates that this would be completely ineffective, and 5 indicates that it would be extremely effective: If the Government provided more information on the impact which these changes would have	25
6	There are a number of ways in which the Government could look to encourage people to install better insulation. Looking at the following proposals, do you think these would be effective or ineffective at encouraging people to make these changes?Please rate on a scale of 1 to 5, where 1 indicates that this would be completely ineffective, and 5 indicates that it would be extremely effective: If the Government provided more information on how to make these changes	30
7	There are a number of ways in which the Government could look to encourage people to install better insulation. Looking at the following proposals, do you think these would be effective or ineffective at encouraging people to make these changes?Please rate on a scale of 1 to 5, where 1 indicates that this would be completely ineffective, and 5 indicates that it would be extremely effective: If the Government provided grants, which would not need to be paid back, to help people cover the upfront costs	35
8	There are a number of ways in which the Government could look to encourage people to install better insulation. Looking at the following proposals, do you think these would be effective or ineffective at encouraging people to make these changes?Please rate on a scale of 1 to 5, where 1 indicates that this would be completely ineffective, and 5 indicates that it would be extremely effective: If the Government provided loans, which would need to be paid back, to help people cover the upfront costs	40
9	Which of the following, if any, would you trust most to provide information on how to install things like insulation, solar panels and heat pumps?Please select up to three.	45
10	Below are some of the main low-carbon energy sources which the UK could invest in. For each one, indicate if you would support or oppose the UK building more of this energy source.: Solar power	50
11	Below are some of the main low-carbon energy sources which the UK could invest in. For each one, indicate if you would support or oppose the UK building more of this energy source.: Onshore wind	55

12 Below are some of the main low-carbon energy sources which the UK could invest in. For each one, indicate if you would support or oppose the UK building more of this energy source.: Offshore wind 60

13 Below are some of the main low-carbon energy sources which the UK could invest in. For each one, indicate if you would support or oppose the UK building more of this energy source.: Nuclear power 65

14 Below are some of the main low-carbon energy sources which the UK could invest in. For each one, indicate if you would support or oppose the UK building more of this energy source.: Hydro power 70

15 Solar power works by capturing energy from the sun, and turning it into electricity and heat energy. Now, thinking specifically about your local area, would support or oppose the UK building more of this energy source in your local area? 75

16 Wind farms work by capturing energy from the wind, and converting this into electricity. Now, thinking specifically about your local area, would support or oppose the UK building more of this energy source in your local area? 80

17 Nuclear power (nuclear fission) works by splitting uranium atoms into smaller atoms. The heat produced from this reaction is used to generate electricity. Now, thinking specifically about your local area, would support or oppose the UK building more of this energy source in your local area? 85

18 You said you would oppose more investment in solar power in your area. What are the main reasons for this?Please select up to three. 90

19 You said you would oppose more investment in onshore wind power in your area. What are the main reasons for this?Please select up to three. 95

20 You said you would oppose more investment in nuclear power in your area. What are the main reasons for this?Please select up to three. 100

21 You said you would oppose more investment in solar power. Which of the following would be most likely to change your mind on this and make you support solar power?Please select up to three. 105

22 You said you would oppose more investment in onshore wind. Which of the following would be most likely to change your mind on this and make you support onshore wind?Please select up to three. 110

23 You said you would oppose more investment in offshore wind. Which of the following would be most likely to change your mind on this and make you support offshore wind?Please select up to three. 115

24 You said you would oppose more investment in nuclear power. Which of the following would be most likely to change your mind on this and make you support nuclear power?Please select up to three. 120

25 You said you would oppose more investment in hydro power. Which of the following would be most likely to change your mind on this and make you support hydro power?Please select up to three. 125

26 Some people in the UK have been resistant to development of solar power in their areas. Would you support or oppose the Government doing the following to encourage people to support these developments?: Stopping local people being able to have a say over solar power developments in their local area . . 130

27 Some people in the UK have been resistant to development of solar power in their areas. Would you support or oppose the Government doing the following to encourage people to support these developments?: Give people money or bill reductions to compensate them for having a solar power development in their area 135

28 Some people in the UK have been resistant to development of wind power in their areas. Would you support or oppose the Government doing the following to encourage people to support these developments?: Stopping local people being able to have a say over wind power developments in their local area . . 140

29 Some people in the UK have been resistant to development of wind power in their areas. Would you support or oppose the Government doing the following to encourage people to support these developments?: Give people money or bill reductions to compensate them for having a wind power development in their area 145

30 Some people in the UK have been resistant to development of nuclear power in their areas. Would you support or oppose the Government doing the following to encourage people to support these developments?: Stopping local people being able to have a say over nuclear power developments in their local area 150

31 Some people in the UK have been resistant to development of nuclear power in their areas. Would you support or oppose the Government doing the following to encourage people to support these developments?: Give people money or bill reductions to compensate them for having a nuclear power development in their area 155

32 In general, do you agree or disagree with the following arguments in favour of investing in low-carbon energy sources such as nuclear, wind or solar energy?: It means the UK will depend less on energy which is imported from other countries like Russia 160

33 In general, do you agree or disagree with the following arguments in favour of investing in low-carbon energy sources such as nuclear, wind or solar energy?: It means that the UK has more control over its own supply which would bring down costs 165

34 In general, do you agree or disagree with the following arguments in favour of investing in low-carbon energy sources such as nuclear, wind or solar energy?: It would reduce the damage which the UK does to the environment 170

35 In general, do you agree or disagree with the following arguments in favour of investing in low-carbon energy sources such as nuclear, wind or solar energy?: It would make the air in the UK cleaner and reduce health conditions from dirty air 175

36 In general, do you agree or disagree with the following arguments in favour of investing in low-carbon energy sources such as nuclear, wind or solar energy?: It would bring new jobs to the UK and help reduce unemployment 180

37 In general, do you agree or disagree with the following arguments in favour of investing in low-carbon energy sources such as nuclear, wind or solar energy?: It would bring new local jobs into the areas where it was being developed 185

38 In general, do you agree or disagree with the following arguments against investing in low-carbon energy sources such as wind, solar or nuclear energy?: It would not positively benefit the environment 190

39 In general, do you agree or disagree with the following arguments against investing in low-carbon energy sources such as wind, solar or nuclear energy?: It would cost the UK too much money, damaging the economy 195

40 In general, do you agree or disagree with the following arguments against investing in low-carbon energy sources such as wind, solar or nuclear energy?: It would get rid of jobs in industries like oil and gas, increasing unemployment 200

41 In general, do you agree or disagree with the following arguments against investing in low-carbon energy sources such as wind, solar or nuclear energy?: It would require unattractive development in parts of the UK, destroying the British countryside 205

42 In general, do you agree or disagree with the following arguments against investing in low-carbon energy sources such as wind, solar or nuclear energy?: It would require lots of development and building works which will disrupt communities 210

43 In general, do you agree or disagree with the following arguments against investing in low-carbon energy sources such as wind, solar or nuclear energy?: The jobs created by this investment would not be for local people in the UK 215

44 If the Government was looking to introduce policies to help with increasing the adoption of environmental solutions (like nuclear, solar or wind energy) and green home changes (such as smart meters and insulation), which of the following would you most support? 220

45 In your view, which of the following is most important? 225

46 In general, which of the following do you think needs to change the most to ensure that the UK reduces its reliance on oil and gas 230

47 To what extent do you support or oppose the following as ways for the Government to reduce the impact of transport on the environment in the UK?: Restricting how much people are able to use car 234

48 To what extent do you support or oppose the following as ways for the Government to reduce the impact of transport on the environment in the UK?: Taking away car parking spaces and replacing it with bike storage 239

49 To what extent do you support or oppose the following as ways for the Government to reduce the impact of transport on the environment in the UK?: Expanding access to car-sharing schemes 244

50 To what extent do you support or oppose the following as ways for the Government to reduce the impact of transport on the environment in the UK?: Reducing the cost of public transport 249

51	To what extent do you support or oppose the following as ways for the Government to reduce the impact of transport on the environment in the UK?: Increasing the availability of electric vehicle charging points	254
52	To what extent do you support or oppose the following as ways for the Government to reduce the impact of transport on the environment in the UK?: More frequent buses	259
53	To what extent do you support or oppose the following as ways for the Government to reduce the impact of transport on the environment in the UK?: Building more local train lines	264
54	To what extent do you support or oppose the following as ways for the Government to reduce the impact of transport on the environment in the UK?: Free parking for electric vehicles (EVs)	269
55	To what extent do you support or oppose the following as ways for the Government to reduce the impact of transport on the environment in the UK?: Increased taxation on those who drive a lot	274
56	To what extent do you support or oppose the following as ways for the Government to reduce the impact of transport on the environment in the UK?: Taking away car parking spaces and replacing it with Electric Vehicle charging points	279
57	Which of the following comes closest to your view?	284
58	To what extent do you agree or disagree with the following?: My area does not need any new development	289
59	To what extent do you agree or disagree with the following?: New developments in my area tend to be ugly	294
60	To what extent do you agree or disagree with the following?: I would like more power to object to new developments in my area	299
61	To what extent do you agree or disagree with the following?: My area looked better 20 years ago than it does now	304
62	To what extent do you agree or disagree with the following?: The newest buildings in my area tend to be of a higher quality	309
63	Which of the following comes closest to your view?	314
64	To what extent do you agree or disagree with the following?: We should avoid building on green spaces	319
65	To what extent do you agree or disagree with the following?: People who object to new developments make it hard for areas to get better	324
66	To what extent do you agree or disagree with the following?: The Government should make it easier for developers to build in green spaces	329
67	Which of the following comes closest to your view?	334
68	Which of the following comes closest to your view?	339
69	Which of the following comes closest to your view?	344
70	Which of the following comes closest to your view?	349
71	Would you support or oppose the introduction of a windfall tax - a one-off tax on profits which were very high - on the profits of energy companies? . . .	354

(1.A) There are a number of ways in which the Government could look to encourage people to install smart meters. Looking at the following proposals, do you think these would be effective or ineffective at encouraging people to make these changes? Please rate on a scale of 1 to 5, where 1 indicates that this would be completely ineffective, and 5 indicates that it would be extremely effective: If the Government provided grants, which would not need to be paid back, to help people cover the upfront costs

Fieldwork: 13th May - 18th May 2022

Data weighted by interlocking age & gender, region and social grade to Nationally Representative Proportions

(2.B) There are a number of ways in which the Government could look to encourage people to install smart meters. Looking at the following proposals, do you think these would be effective or ineffective at encouraging people to make these changes? Please rate on a scale of 1 to 5, where 1 indicates that this would be completely ineffective, and 5 indicates that it would be extremely effective: If the Government provided loans, which would need to be paid back, to help people cover the upfront costs

Data weighted by interlocking age & gender, region and social grade to Nationally Representative Proportions

(4.B) There are a number of ways in which the Government could look to encourage people to install smart meters. Looking at the following proposals, do you think these would be effective or ineffective at encouraging people to make these changes? Please rate on a scale of 1 to 5, where 1 indicates that this would be completely ineffective, and 5 indicates that it would be extremely effective: If the Government provided more information on the impact which these changes would have

Data weighted by interlocking age & gender, region and social grade to Nationally Representative Proportions

(6.B) There are a number of ways in which the Government could look to encourage people to install better insulation. Looking at the following proposals, do you think these would be effective or ineffective at encouraging people to make these changes? Please rate on a scale of 1 to 5, where 1 indicates that this would be completely ineffective, and 5 indicates that it would be extremely effective: If the Government provided more information on how to make these changes

Data weighted by interlocking age & gender, region and social grade to Nationally Representative Proportions

(8.B) There are a number of ways in which the Government could look to encourage people to install better insulation. Looking at the following proposals, do you think these would be effective or ineffective at encouraging people to make these changes? Please rate on a scale of 1 to 5, where 1 indicates that this would be completely ineffective, and 5 indicates that it would be extremely effective: If the Government provided loans, which would need to be paid back, to help people cover the upfront costs
