(29.A) There are different opinions on the UK’s policy on refugees. One approach is allowing refugees to settle in the UK through ‘community sponsorship’. This policy allows ordinary Britons together with their churches, community groups and schools to volunteer to sponsor refugees by doing things like helping them find a job, learn English and generally settle into their community. Under these conditions, would you support or oppose the UK accepting more refugees?

(29.C) There are different opinions on the UK’s policy on refugees. One approach is allowing refugees to settle in the UK through ‘community sponsorship’. This policy allows ordinary Britons together with their churches, community groups and schools to volunteer to sponsor refugees by doing things like helping them find a job, learn English and generally settle into their community. Under these conditions, would you support or oppose the UK accepting more refugees?
