

Modelling the impact of an international student fees levy at the constituency level

Counting the cost, part 2

Annie Bell, Rhiannon McQuone, Jonathan Simons, Scott Corfe, Ben Savours and Dr Vikram Bahure,
September 2025

Context

In May 2025, the Home Office published the Immigration White Paper. This paper proposed a 6% levy on all international student fees. Given the well documented financial challenges in the sector, we conclude that most universities are unlikely to be able to take much of a hit to their bottom line, and as such we assume that any levy will be passed on to international students in the form of fee rises.

In new modelling released by Public First in September 2025, we estimate that a policy change which increases international student fees in this way will lead to a loss of 16,100 international students in the first year of the levy, and 77,000 cumulatively in the first 5 years. This will mean a £240 million loss of fee income to the sector, and the UK economy in the first year of the levy, and a loss of £2.2 billion cumulatively over 5 years.

This impact will not be spread evenly across the country. International students tend to be concentrated in certain areas, usually around one, or several, large universities. Public First have therefore also modelled what the impact of the levy will be on the Gross Value Added (GVA) on every constituency in the UK each year, once the levy has bedded in.

You can find the headlines from the data, as well as the full data breakdown, below.

Headlines from the data

National and regional impact:

- The total impact of an international student fee levy at 6% would be a GVA loss of **£1.8 billion** in the first year alone
- The most affected regions/nations of the UK would be:
 - Greater London (£480 million)
 - Scotland (£197 million)
 - South East of England (£163 million)
 - West Midlands (£141 million)
 - North West (£139 million)
- **9 out of 12 UK regions would face a GVA loss of over £100 million in the first year** of a 6% levy

Constituency-level impact:

- In the top **10 most-affected constituencies**, the **average GVA loss is £40 million**
- The worst-affected constituencies, based on the current distribution of international students across the country, tend to be those in close proximity to the biggest universities in the country. These include constituencies in London, Coventry and Manchester
- **37 of the top 50 most impacted constituencies are currently seats held by Labour MPs**

Caveat: This model assumes that the proportion of each constituency's population that is made up of international students will remain the same after the levy (and subsequent reduction in student numbers). However, we do not anticipate that this will be the case, in the event of a significant down-turn in international student demand - meaning the impact could be felt even more strongly in places where students make a vital contribution to local skills needs and local economies.

Chart 1: Projected GVA loss to each UK region

Potential GVA loss in each of the UK's regions and nations if the levy came into force and international student numbers reduced as-per our projections (in £millions)

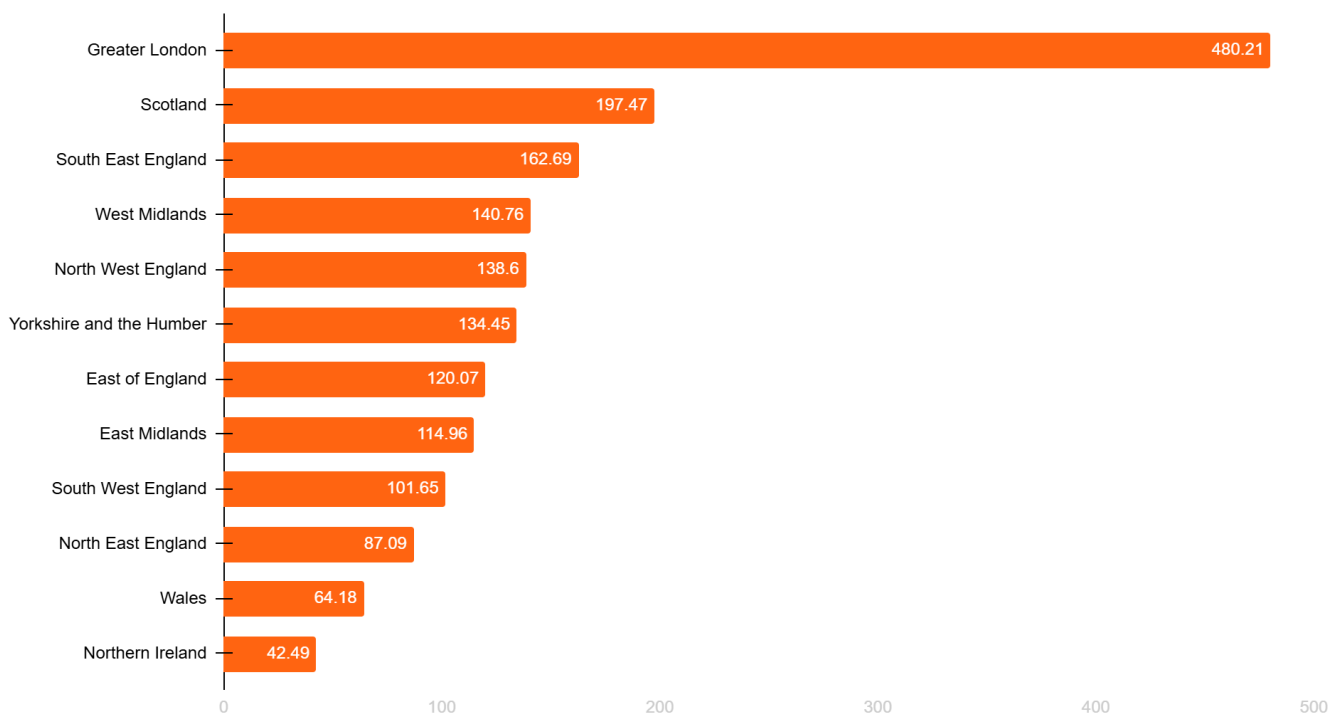

Chart 2: Projected GVA loss to each parliamentary constituency, 10 parliamentary constituencies whose GVA is most severely affected

Potential GVA loss in each parliamentary constituency if the levy came into force and international student numbers reduced as-per our projections (in £millions)

10 parliamentary constituencies whose GVA is most severely affected by this change

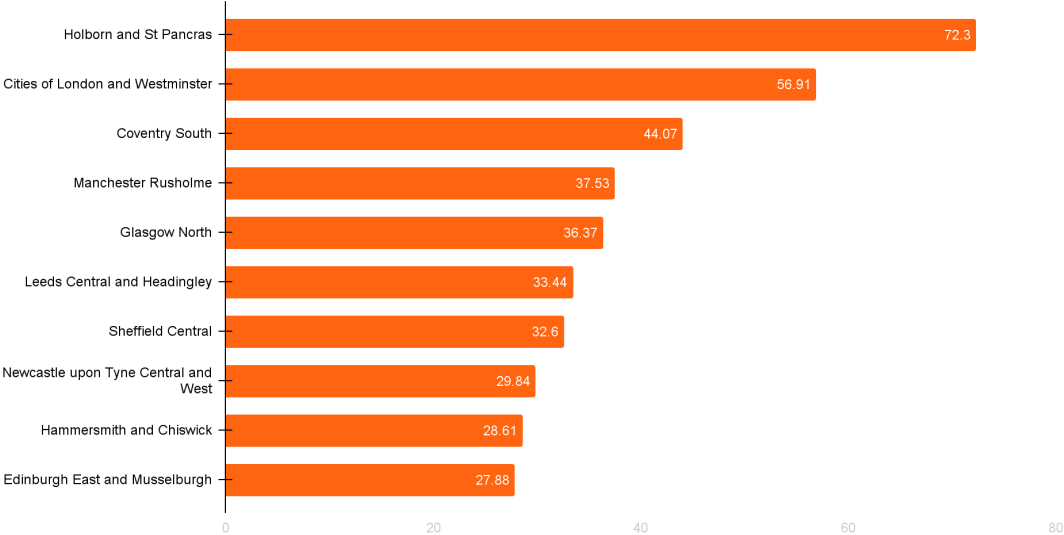

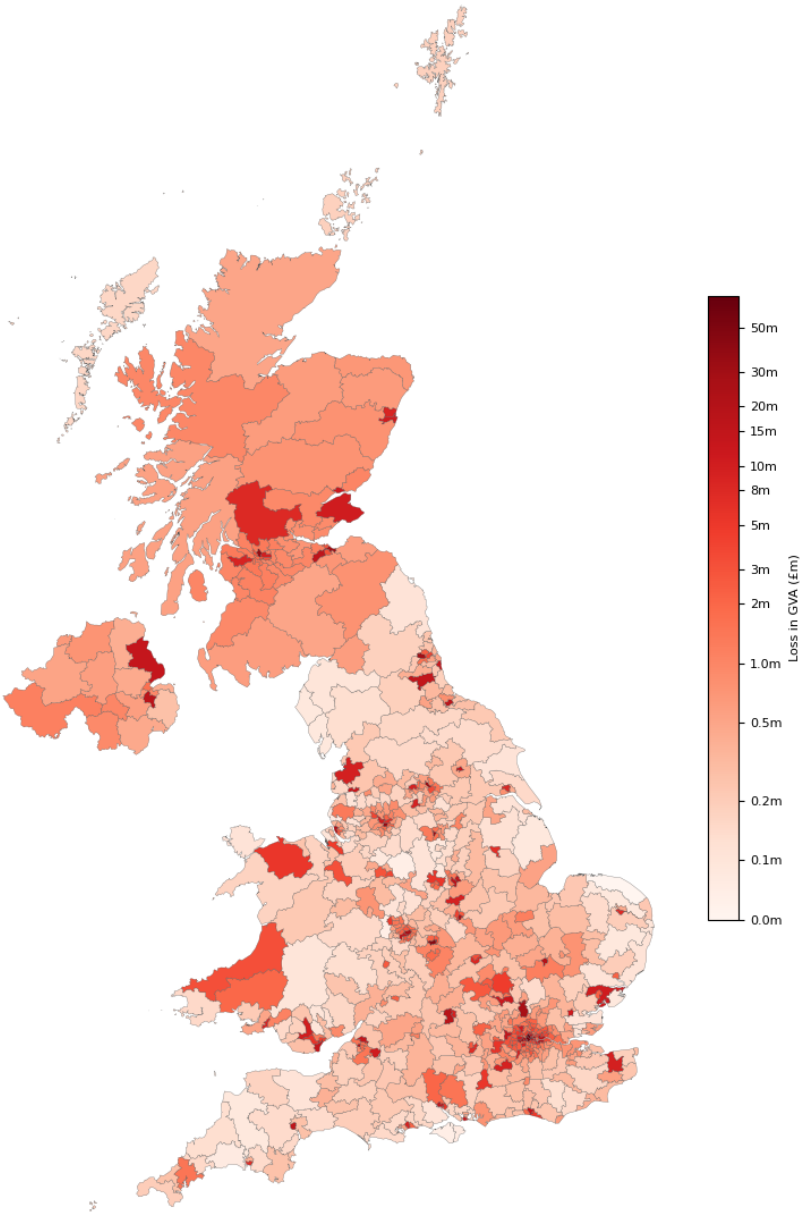

Chart 3: Estimated GVA impact (negative) by Parliamentary constituency from a projected decrease in international students

Appendix 1: Full constituency-level data breakdown

You can also download this in spreadsheet form from the Public First website.
